REPUBLIC P-47 THUNDERBOLT

Illustrated & compiled by RICHARD WARD
Text: Ernest R. McDowell

ACKNOWLEDGEMENTS

Co-operation makes all things possible and only co-operation from many friends made possible this pictorial survey of the big Jug, one of the famous fighters of World War II years. My thanks to all those who assisted whose names are listed below in alphabetical order.

SECOND IMPRESSION 1971
Fifty-eight fighter groups in the USAAF, at one time or another during World War II, flew the Republic P-47 Thunderbolt. Despite the number of groups involved, the 4th, 6th, 11th and 13th Air Forces did not have a single squadron equipped with the Jug. The 9th Air Force with a total of 16 groups was the largest user of the aircraft.

The 1st, 2nd and 3rd Air Forces in the Zone of the Interior operated a number of training groups which had Thunderbolts as part of their equipment. The 4th Air Force did not have a single P-47 assigned, possibly because it was located in the Western half of the U.S. where several rival manufacturers were located and they felt it would not look too good to have their plants protected by Republic’s pride and joy, or possibly it was merely coincidence.

Groups in the training command operated OTU’s and RPT squadrons equipped with P-47’s and it was not at all unusual for a pilot to be trained for combat on the P-47 only to find himself flying a P-40 or P-39 when he reached an operational unit depending on the area to which they were assigned upon completion of the course.

FIFTH AIR FORCE, SWPA

The 5th had four Thunderbolt Groups assigned, not all of these were completely equipped with the P-47 but most were so equipped.

The 35th Fighter Group converted to P-47’s late in 1943 and after working up to operational status began operations early in 1944. Operating out of Nadzab and Gusap, New Guinea, they flew interdiction missions against Japanese air bases and other installations in Halmahera, Borneo and the southern part of the Philippines. During this period Lt.-Col. Edwin A. Doss was replaced as Group CO by Lt.-Col. Furlo S. Wagner. After helping to soften up the defences prior to the U.S. Army’s invasion of the Philippines, they then provided close air support for the ground forces on Luzon. Later they flew bomber escort missions and fighter sweeps to China and Formosa.

The 49th Fighter Group received only enough P-47’s to re-equip the 9th Fighter Squadron, “The Flying Knights”. At the time, the 49th was one of the few Groups to have each of its three squadrons flying a different type of fighter aircraft, as the other two were using the P-40 and P-38. The Group CO, Lt.-Col. David A. Campbell, flew a P-47 on many missions. The 9th flew Jugs from Nov. 1943 until April 1944 operating out of Gusap. Their first mission was escorting B-24’s to Wewak, a large Japanese force hit the B-24’s and shot down three before the 9th could intervene but once in action they shot down eleven Jap fighters without loss to themselves.

The 58th Fighter Group trained on the P-47 and kept it throughout the entire war. They began operations in Feb. 1944, being broken in slowly by first flying security patrols over U.S. bases and then escorting C-47’s. Moving up to bomber escort duties, they covered raids over New Guinea and later escorted convoys to the Admiralty Islands. In August 1944 they moved to Noemfoor and began tactical operations strafing and dive bombing targets in Ceram, the Kai Islands and Halmahera. November found the Group in the Philippines where they continued the tactical and interdiction roles. On 26th Dec. 1944 they surprised a Japanese Naval force off Mondoro and so effectively strafed that it was forced to withdraw before it could do any damage to that base, for this action they were awarded a DUC. They moved to Okinawa in July 1945 and remained there until VJ Day operating in the tactical role against targets in Korea and Kyushu.

The 348th Fighter Group was the last of the P-47 outfits in the 5th Air Force. Preparing for combat with the Jug they moved to New Guinea in May of 1943. Awarded two DUC’s one for covering Allied landings and furnishing ground support on New Britain in Dec. 1943 and the other for thwarting a large enemy fighter force while escorting bombers raiding Clark Field on 24th Dec. 1944, their biggest moment came on 11th Oct. 1943. Col. Neel E. Kearby, flying “Firey Ginger”, was on his way home, leading his flight after a recce mission over Wewak, when he
P-47C, Unit unknown, 3rd Air Force, Z1, OD and grey finish, yellow/white cowl, yellow/white/blue fuselage stripes.

P-47D, 53rd Fighter Group, 13th Fighter Squadron, 3rd AF, Z1, OD and grey finish, yellow cowl, fuselage stripes and fin tip. White P88.

P-47D, 58th Fighter Group, 69th Fighter Squadron, 5th AF, Saidor, New Guinea, SWPA. OD and grey scheme. Flown by Capt. Harry L. McMullen. (See plan view.) 'The Golden Gopher.'

P-47D, 318th Fighter Group, 73rd Fighter Squadron, 7th AF, Saipan, Marianas, PQA. OD and grey scheme. 'Sonny Boy' in white on cowl. (See plan view.)

P-47D, 57th Fighter Group, 66th Fighter Squadron, 12th AF, Italy. Natural metal with OD top decking, red band round cowl and spinner. Yellow band outlined black on fin and rudder. 'Billie' white outlined black.

P-47D, Unit unknown, 1st French Air Force supporting 1st French Army, North East France 1944. OD and grey scheme. (See plan view.)

P-47D, Dominican Air Force. Natural metal with black top decking and white stripe. Blue cowl and fin top, black lettering. (See plan view.)

P-47D, Yugoslav Air Force. Natural metal with black top decking. Black serial 13054. (See plan view.)

P-47D, 11th Fighter Group, Kangwan Field, Shanghai, Chinese Air Force, 1947. Natural metal finish with OD top decking, black band round cowl. 'Lady Aurene' in red outlined white. (See photo.)

sighted a Jap bomber formation escorted by more than 30 fighters. Despite the low fuel situation and the odds against them, the four Thunderbolts roared into the formation and completely disrupted it, in the ensuing action Kearby personally shot down six aircraft and was subsequently awarded the Congressional Medal of Honour.

SEVENTH AIR FORCE, POA

The 318th Fighter Group operated from the Marianas in June 1944 in support of ground forces on Saipan, Tinian and Guam before moving to the Ryukus in April 1945. From there they hit targets in Japan and China and flew bomber escort to these targets as well.

The 508th Fighter Group was the second P-47 outfit with the 7th Air Force and were one of those equipped with the long range P-47N’s. They were moved to Hawaii in Jan. 1945 to provide long range bomber escort but due to the lateness in becoming operational they were mainly used as an RTU and as part of the Island’s defences.

EIGHTH AIR FORCE, ETO

The Eighth Air Force had a total of eleven Thunderbolt Groups assigned, including the top group so far as aerial victories were concerned in the 56th Fighter Group.

The 4th Fighter Group converted to the P-47 after flying Spitfires and they did not take kindly to their new aircraft and most were happy to see them replaced by the P-51B later. Since the exploits of the 4th have been covered so well in books and articles they will not be dwelt with at length here.

The 56th Fighter Group, ‘Zempke’s Wolfpack’, was without a doubt the greatest of the Thunderbolt groups, they produced the top scoring ace so far as aerial kills were concerned in Col. Francis Gabreski with 31 (see colour illustration A1). Not far behind came Col. Dave Schilling with 22½, Zempke with 19½ and Capt. Robert S. Johnson with 28, all aerial victories. The 56th received two DUC’s, one for aggressiveness in seeking out and destroying enemy aircraft, from 20th Feb. to 9th March 1944, the other for strikes against anti-aircraft positions while supporting the airborne attack on Holland in Sept. 1944.

The 78th Fighter Group began operations from England in April of 1943. Like the 56th, the 78th received a DUC for supporting the airborne attack on Holland by escorting troop carriers and strafing ground positions.

The 352nd Fighter Group flew the P-47 from September 1943 until April 1944. Their CO, Col. John C. Meyer, shot down his first enemy plane while flying a Thunderbolt and went on to become the leading ace of the 8th Air Force, with 24 aerial kills plus 13 aircraft destroyed on the ground, a grand total of 37.

The 353rd Fighter Group flew the P-47 from August 1943 until Oct. 1944, this Group also received a DUC for their part in the airborne attack on Holland. Cast mainly in a tactical role, the 353rd did a fine job in that respect.

The 355th Fighter Group flew its first combat mission on 14th Sept. 1943, a fighter sweep over Belgium. From then on they were mostly engaged in bomber escort missions to Berlin, Karlsruhe, Neuberg, Misburg, Gelsenkirchen and Minden.

The 356th Fighter Group flew T-Bolts from Oct. 1943 until Nov. 1944 and despite being mainly used in a tactical role, Lt.-Col. Donald A. Baccus achieved acedom by scoring a total of 9 kills.

The 358th Fighter Group served both in the 8th and 9th Air Force and will be covered with the 9th Air Force Groups.

The 359th Fighter Group entered combat in mid December 1943, the Group converted to P-51B’s in April 1944. Most T-Bolt missions were of the escort type.

The 361st Fighter Group flew their first combat mission in P-47’s on 21st Jan. 1944 and flew them until May 1944. The group was mainly engaged on escort work.

The 413th Fighter Group was the last group assigned to the 8th AF. This Group was originally assigned to the 20th Air Force and had the long range P-47N as equipment, when the 8th AF was sent to the Pacific the 413th was reassigned. The Group flew a few strafing missions from Saipan to Truk before being moved to Ie Shima where they flew interdiction missions against Japan proper.

NINTH AIR FORCE, ETO

The 366th Fighter Group flew combat from May 1944 to May 1945. Winning two DUC’s while operating primarily as a fighter-bomber unit. The first DUC was earned strafing Nazi columns south of the Loire on 1st Sept. 1944 which disrupted their orderly retreat across Central France, second DUC was for shooting up airfields in Southern Germany on 12th April 1945.

The 48th Fighter Group flew P-47’s throughout their career, receiving a DUC on 6th Dec. 1944 for ground support against an enemy stronghold at Julich, facing heavy ground fire while flying below a heavy overcast. This Group also received three Belgian citations.

The 509th Fighter Group entered combat on 1st May 1944 with new P-47’s. Received a DUC for close support of the 7th Army’s assault on the Seig-
frield Line in March 1945. A second DUC resulted from a raid on an airfield near Munich on 25th April 1945.

The 354th Fighter Group operated P-47’s from Nov. 1944 until Feb. 1945, supporting ground forces during the Battle of the Bulge. The top scoring ace in the 9th Air Force was a member of this Group, Lt.-Col. Glenn T. Eagleston had a total of 18½ victories (see colour illustration).

The 358th Fighter Group had originally been with the 8th Air Force but was reassigned to the 9th. The Group got a DUC for action in support of the 7th Army during a period from 24th Dec. 1944 to 2nd Jan. 1945. Their second DUC was won by shooting up German vehicles on 19-20th March 1945 and a third DUC resulted for raids on German airfields and other targets between 8th and 25th April 1945. Known as the ‘Orangetails’ they were probably the most colourful Group in the 9th AF (see colour illustration).

The 362nd Fighter Group went into action for the first time escorting B-24’s on a raid on V-weapon sites in the Pas de Calais on 8th Feb. 1944. They won two DUC’s, one for a mission against the heavily defended harbour area of Brest on 25th Aug 1944, their second for close support in the Moselle, Rhine River triangle on 16th March 1945.

The 365th Fighter Group, initiated into combat in Feb. 1944, very quickly developed a high degree of efficiency in close-support work. Awarded a DUC for an aerial duel over the Bonn-Dusseldorf area in Germany on 21st Oct. 1944, they followed with another on 20th April 1945 for tactical support work in Southern Germany.

The 366th Fighter Group flew its initial mission, a fighter sweep along the French coast on 14th March 1944. Their DUC was won the hard way, they shot up an enemy tank column at St. Lo despite heavy rain and poor visibility on 11th July 1944. This action saved a large number of Allied troops from ambush who were unaware of the German armoured force nearby.

The 367th Fighter Group traded their P-38’s for Thunderbolts in Feb. 1945. On March 19th 1945 they won a DUC for dive bombing and strafing the headquarters of the German Commander in Chief, West, at Ziegenburg despite the fact that the target was concealed by haze, heavily defended, and in mountainous terrain.

The 368th Fighter Group, like so many others, broke in the P-47’s by making a fighter sweep along the French coast, operational on the 14th March 1944 they won a DUC for tactical operations near Mons on 3rd Sept. 1944.

The 370th Fighter Group was a group which trained on the P-47 in the ZI but when they arrived in England in February 1944 were equipped with the P-38.

The 371st Fighter Group began operations with the standard sweep of the French coast in April 1944. Finally they were awarded a DUC but only after a long and varied career, it came on the basis of a six day operation during the period of 15-21st March 1945, in Southern Germany.

The 373rd Fighter Group flew its first mission, a fighter sweep over Normandy, on 8th May 1944 and...
then flew B-26 escort missions for several months, moving to the Continent in July 1944. This group got its DUC for action which aided the Allied ground forces to cross the Rhine. On 20th March 1945 they repeatedly hit vital airfields in the German zone, clobbered rail lines and highways, cutting off supplies and reserves headed for the battle area. All of these attacks were carried out without the loss of a single Group aircraft.

The 404th Fighter Group entered combat on 1st May 1944 and was confined to operations in the Normandy area until June 7th. Subsequently moved to the Continent and flew escort missions, a DUC was presented to the group for three armed recon missions flown on 10th Sept. 1944. A French Croix de Guerre with Palm for assisting the 1st Army at St. Lo on 29, 30 and 31st July 1944, the Group was also cited by the Belgian government.

The 405th Fighter Group served in combat with its P-47’s from April 1944 to 8th May 1945. A DUC was awarded this group which would have made a writer of fiction envious. On Sept. 24th 1944, the 3rd Army was in a tight spot near Lancesville en-Saulnois where a vicious tank battle was raging, two of the squadrons flew through heavy rain on instruments alone and despite the dense overcast and ground fog were able to locate the battle area, where ground controllers took over and zeroed them in on the target area. The first squadron bombed and strafed the tanks, while the second squadron hit and wiped out a convoy of trucks and armoured vehicles. The Belgian Government also cited the 405th.

The 406th Fighter Group went into action in May 1944, received a DUC for destroying a column of armoured vehicles attempting to break out the Belfort Gap. Its second DUC was earned at Bastogne on 23-27th Dec. 1944 when they kept operating within an area ten miles in radius round the besieged garrison.

TWELFTH AIR FORCE, ITALY

The 27th Fighter Group had been wiped out in the Philippines and transferred without equipment or personnel to the ZI, assigned then to the 12th AF in the Mediterranean they converted to P-47’s in June 1944. Their DUC was won for preventing three German armoured divisions from reaching the Salerno beachhead on 10th Sept. 1943. A second DUC came when they disrupted a German retreat on 4th Sept. 1944 thereby assisting the 7th Army’s advance up the Rhone Valley.

The 57th Fighter Group got their aircraft in early 1944, they almost immediately won a DUC for a series of interdictory attacks in the Florence-Arezzo area on 14th April 1944. This Group featured some interesting squadron names, the Black Scorpions, Red Fighting Cocks and the Exterminators.

The 79th Fighter Group like the 57th named its squadrons, being respectively the Flying Skulls, Comanches and Skeeters. The 79th inherited some of their P-47’s from the 325th Group when they converted to Mustangs, a common practice in this theater. They received their second DUC, their first had been won supporting the British 8th Army while flying P-40’s in the Western Desert, for numerous missions on low level attacks on positions along the Santerno River, Italy.

The 86th Fighter Group received two DUC’s, one for tactical support just outside Rome on 25th May 1944 and the other for same type of operations in Northern Germany on 20th April 1945.

The 324th Fighter Group converted to P-47’s in July 1944, they were awarded the French Croix de Guerre with Palm for supporting French forces during the campaigns in Italy and France 1944-45. The 324th featured a lightning flash on the fuselage as the Group identification mark.
The 350th Fighter Group converted to the Thunderbolt during Aug. and Sept. 1944 and received a DUC for an action in Italy that resulted in a total of ten missions being flown in an interdictory role on 6th April 1944. 1st Lt. Raymond L. Knight was awarded the Congressional Medal of Honour for missions flown against enemy airfields in which he accounted for the destruction of 20 aircraft personally; these missions were voluntarily made and covered the two day span from 24-25th April 1945. Lt. Knight was killed when he crashed in the Apennines trying to bring his badly damaged aircraft home to save it rather than electing to bail out.

TENTH AIR FORCE, CBI

The 33rd Fighter Group after compiling an excellent record in North Africa and Italy was transferred to India and joined the 14th Air Force in Feb. 1944. After equipping with P-47’s they moved to China in April to fly patrols and interdict mission missions while training continued. The Group returned to India and was reassigned to the 10th Air Force in Sept. 1944. Used mainly in a dive-bombing and strafing role in Burma, they participated in all campaigns in this area until VJ-Day.

The 80th Fighter Group was entrusted with the task of defending the Indian terminal of the Hump route. They hit Japanese airfields and also provided a protective air patrol over Allied air bases, they were awarded a DUC for the mission of 27th March 1944 when they intercepted and routed a large Japanese bomber formation and escort, forcing the bombers to jettison their bombs they prevented the possible loss of a large oil refinery in the Assam Valley.

The 1st Air Commando Group, originally formed as a composite force to support Wingate’s Raiders, the Chindits, who were operating behind Japanese lines in Burma. The 5th and 6th Fighter Squadrons converted to the P-47 in May 1944 and operated them on bomber escort missions to Rangoon and elsewhere and on strafing attacks on enemy airfields, bridges, troop concentrations, oil wells etc. until May 1945 when they received P-51D’s.

FOURTEENTH AIR FORCE, CBI

The 33rd Fighter Group was previously covered as a unit of the 10th Air Force.

The 81st Fighter Group was the other P-47 group to serve with the 14th. Like the 33rd it had operated in North Africa before being sent to India. Upon converting to P-47’s it was moved to China in May 1944 but did not begin full scale operations until January 1945. Used mainly in ground and support roles the Group remained in combat in China until VJ-Day.

FIFTEENTH AIR FORCE, ITALY

The 325th Fighter Group known as the Checkertail Clan or Checkertails were the top scoring Group of the 15th Air Force, this organisation produced a number of Aces, among them Maj. H. H. Green with 10, Lt. E. H. Emmons with 8, Maj. L. W. Chick, Jr., and Capt. W. A. Rynneccead had 6, while Lt. G. P. Novotny had the basic 5, all these victories were scored flying the P-47. A DUC was awarded the Group for a daring raid on the airfield at Villaorba, the major part of the mission was flown over the sea in thick haze at less than 50 feet. So complete was the surprise that they shot down 37 German fighters for a loss of only two of their own. During the P-47 era the Group was first led by Col. Robert Baxelder and then by Col. Chet Studer, both outstanding leaders and superb fighter pilots.

The 332nd Fighter Group, the only all Negro fighter group, inherited the Checkertail Thunderbolts but kept them for only two months, April and May 1944, before converting to P-51’s. The 332nd was led by Col. Benjamin O. Davis who is now a Major General. Such a short period on the P-47 hardly gave them time to change the paint scheme and they continued to fly missions with the black and yellow tails.

TWENTIETH AIR FORCE, POA

The 413th Fighter Group originally was assigned to the 20th but flew most of its missions of importance after being reassigned to the 8th and was covered under that section.

The 414th Fighter Group joined the 20th on Guam to hit targets in the Truk’s on July 13th and 22nd 1945, it then moved to Iwo Jima later in the month to attack a radar station on Chichi Jima. Remaining on Iwo Jima mounted a series of strafing raids on the Japanese home islands before being sent to the Philippines in late 1945. While at Clark Field it was reassigned to the 13th Air Force but never flew a mission under the 13th’s colours.

POST-WAR P-47 ASSIGNMENTS

The Thunderbolt remained in squadron service with the Occupation Forces and in all other theaters after the war and was assigned to a large number of Air Guard squadrons of the National Guard where it was flown by the week-end warriors as late as the early 1950’s.

*Zombie* now with a/c letter U and newly fitted Malcolm canopy, flown by same pilot but now Maj. T. Bailey. Martlesham, 20th November 1944. (USAF)

P-47D's of GC III/3 'Ardennes' rousing up prior to taking off on bombing mission. (J. Cuny)

See page 46 for squadron insignia.

P-47D of GC III/3, Free French Air Force. (J. Cuny)
A1 56th FG. Non-standard upper surface. Under surface grey sprayed over OD. Note no black fuselage band but white bands thinly outlined with black. Small size national insignia.

A2 56th FG. Upper surface details of this aircraft unknown. Note larger size national insignia.

A3 56th FG. Under surface scheme, note bare metal tailplane and black bands. Only white D-Day bands painted round fuselage, note one band is minus the thin black outline.

A4 56th FG. Standard upper surface OD scheme, national insignia outlined red.

A5 352nd FG. Non-standard under surface presentation of national insignia, very large size in line with leading edge of wing and overlapping ailerons, standard size on upper surface.

B1 353rd FG. Standard OD and grey scheme applicable to 8th and 9th AF P-47D's post D-Day.

C1 78th FG. Standard bare metal scheme.

C3 36th FG, 23rd FS. Standard upper surface scheme.
**F6**
Upper and under surfaces identical.

**F4**
Escuadrón Aereo de Pelea 201.
Upper and under surfaces identical.

**G4**
Standard bare metal scheme. Note some units painted the inner half of pylons black or white. Some units also did not paint bands over control surfaces.

**G6**
No. 73 OTU.
Upper and under surface detail.

**No. 81 Squadron.**

**No. 60 Squadron.**

- **Golden Gopher** 58th FG, 69th FS.
  Upper and under surfaces standard.

**G3**
No. 30 Squadron.
Green/grey upper surface camouflage pattern more or less standard.

**Under surfaces of all camouflaged Mk I and II aircraft pale grey.**

**H1**
Upper surface national insignia detail, note small size, outlined yellow.

**GC III/3,419691 on front cover identical except for rudder stripes.**

**M1**
Standard upper and under surface scheme.
ROYAL AIR FORCE
The Royal Air Force received 826 Thunderbolt Mk. I and Mk. II aircraft and with the exception of No. 73 Operational Training Unit at Feyid, Egypt, MEF, were operated solely by South East Asia Command units. Camouflaged Mk. I’s were delivered in standard RAF green/grey upper surfaces but it seems that upon arrival in SEAC the grey segments were sprayed brown, this also appears to be true of some Mk. II’s though most of the latter retained the green/grey uppers. The last batches of Mk. II’s were delivered and operated in natural metal finish. The sky blue fuselage band was retained on 73 OTU aircraft but always sprayed over on SEAC Thunderbolts. Operated mainly in the fighter-bomber role by SEAC squadrons the RAF found it necessary to impose dive limitations as operational height was usually between 4,000 and 6,000 feet, in other words out of range of Jap light ground fire and below the minimum lethal range of the heavier stuff. One of the first squadrons to equip with the Thunderbolt was No. 5 in late 1944 and one of the last was No. 60 who converted just as the war ended and was to have taken part in Operation ‘Zipper’, the Allied invasion of Malaya. In October 1945 a No. 60 Squadron detachment flew to Batavia from Malaya to give close support to the Allied forces which included the 5th and 23rd Indian Divisions and the 49th Indian Infantry Brigade in their fighting against the Indonesian terrorists, on the 1st December the remainder of the Squadron were brought over to join the detachment now at Sourabaya. By the 11th November 1945 all flying ceased and the Thunderbolts were all broken up.

Squadrons: Nos. 5, 30, 34, 42, 60, 79, 81, 113, 123, 131, 134, 135, 146, 258, 261, 615 and No. 73 OTU, Feyid, Egypt, MEF.

FRANCE
Nearly 500 P-47D’s were supplied to the French, being operated by the Free French and French Air Forces during the last two years of World War II and subsequently by the French Air Force in the fighting in Algeria.

ITALY
A small number were acquired in 1947, forming the equipment of the 5th and 51st Stormos.

BOLIVIA
As a signatory of the Rio Pact of Mutual Defence the Bolivian Air Force received a number of P-47D’s, a few remaining in service until 1964.

BRAZIL
Having declared war on the Axis in 1944 it was decided to send one fighter group on active service overseas. After training in the US the 1st Grupo de Caca became operational in Italy under the command of the USAAF 350th Fighter Group. Subsequently P-47D’s saw service in the BAF during the post-war years.

CHILE
A small batch of P-47D’s were acquired in the late 1940’s to equip one fighter-bomber squadron, subsequently a further 17 aircraft were purchased in 1952.

CHINA
The Chinese Air Force equipped the three squadrons of the 11th Fighter Group with the P-47D in 1947, both the razorback and later P-47D-27-RE were operated side by side. Subsequently some aircraft went to Formosa with Chiang Kai-shek when his government was overthrown by the Communists and remained in service for some time with the Nationalist Air Force, some were also flown by the Chinese Communist Air Force as was the P-51D.

COLUMBIA
One small batch of P-47D’s were acquired in 1947 for the equipment of one squadron, some still flying in 1958.

DOMINICA
The Dominican Air Force operated a small number of P-47D’s with De Havilland Vampires in a mixed fighter-bomber unit, evidently the three flights had cows and upper fins in red, blue and yellow though for some obscure reason aircraft letters were duplicated within the same flight.

ECUADOR
A small batch of P-47D’s were obtained in 1947, some still in service in the middle 1960’s.

HONDURAS
The Honduran Military Air Arm operated the P-47D from 1951 to the middle of the 1960’s.

IRAN
The P-47D first flew in Iranian colours in late 1948, subsequently a total of seven fighter-bomber squadrons were equipped with the type.

MEXICO
The 201st Fighter Squadron equipped with the P-47D saw service during the closing stages of World War II operating from Clark Field, Luzon, Philippines. A few P-47D’s remained in post-war service.

NICARAGUA
One fighter-bomber squadron equipped with the P-47D in 1947.

PERU
Two fighter-bomber squadrons were equipped with the Thunderbolt, the first in 1947, a few still remain on charge.

TURKEY
A small number were acquired in 1948 and were phased out of front-line squadrons with the advent of jets in the early 1950’s.

VENUEZUELA
After signing the Rio Pact a small number of P-47D’s were made available to the Venezuelan Air Force, replaced in first-line service by jets in 1957.

YUGOSLAVIA
150 P-47D’s were supplied for the re-equipping of fighter-bomber squadrons after Yugoslavia signed the Mutual Assistance Pact with the Western Powers.

RUSSIA
Approximately 200 P-47D’s were delivered under Lease-Lend agreement. Some were flown operationally with the factory finish, i.e. with red star on white disc on fuselage and wings.
P-47D, unit unknown, French 1st Air Force. Note 500 lb bombs and small size roundel on upper surface of two nearest a/c. Third a/c with yellow wing bands. (IWM)

F-47D, Imperial Iranian Air Force.
Each publication illustrates one type or major sub-types of a famous aircraft in the colour schemes and markings of the Air Forces of the World. Each issue will contain eight pages of colour side view illustrations, supporting black and white plan view drawings showing where necessary both upper and under surfaces, one hundred and twenty-five half-tone photographs, each issue will also contain one full colour plate illustrating twenty examples of Unit Insignia of the World’s Air Forces.

No. 1 NORTH AMERICAN P-51D MUSTANG IN USAAF-USAF SERVICE.

No. 2 REPUBLIC P-47 THUNDERBOLT, In USAAF-USAF; RAF; Free French; French Air Force; Mexican, Brazilian and other Air Forces.

No. 3 NORTH AMERICAN MUSTANG Mk. I-IV. In RAF; RAFF; SAAF; RNZAF; RCAF service and the NORTH AMERICAN P-51B and D MUSTANG in French; Italian; Swedish; Royal Netherlands; Netherlands East Indies; Indonesian; Israeli; Philippine; Dominican; Somali; South Korean; Chinese Nationalist; Chinese Communist, etc., Air Forces.

No. 4 SUPERMARINE SPITFIRE Mk. I-XVI. MERLIN ENGINE. In RAF; RAFF; SAAF; RCAF; USAAF; Belgian; Polish; Czeckslovakian; Free French; French; R. Norwegian; R. Netherlands; R. Danish; Israeli; Italian; Greek; Turkish; Portuguese; Egyptian; Burmese, etc., Air Forces.

No. 5 NORTH AMERICAN P-51B/C MUSTANG IN USAAF SERVICE. Similar content to No. 1 but with brief coverage of the P-51 and A-36.

No. 6 CURTISS (P-40) KITTYHAWK Mk. I-IV. In RAF; RAFF; RNZAF; SAAF; RCAF; Netherlands East Indies: Russian and Finnish Air Forces. The Curtiss P-40 Warhawk will be covered in a future issue.
