

Typeface  Library

The Bitstream® Collection CD contains 250 professional-quality typefaces in both TrueType® and PostScript® Type 1 format for Macintosh® and IBM PCs (Microsoft® Windows;™ UNIX, and OS/2).

Selected from Bitstream's world-class library of almost 1,100 typefaces, the 250 type designs on this fully unlocked CD-ROM were selected by Bitstream's type professionals to provide users with a comprehensive library of fonts for any typographic need.

Bitstream's typefaces were designed and digitized by a world-renowned staff each with more than 15 years experience in the type industry. All Bitstream typefaces are fully hinted for crisp output and sharp screen display. They also feature extensive kerning data to guarantee precise character spacing and letterfit.

This typeface sample poster shows all of the 250 typefaces on the Bitstream Collection CD. Each typeface appears with its Bitstream font ID number, its name, style and trademark (if applicable).

Bitstream strives to set the highest standards for quality in typeface design and technical performance—we think you'll be happy with the results.

The owners of the trademarks and registered trademarks of typeface names designated by number on this poster correlate to the names shown below. The trademarks designated as "registered" are registered in the United States. These and other trademarks appearing on this poster may be registered in other countries as well.
