

with, the applicable requirements on which it is based.

(iv) A schedule for submission of certified progress reports every 6 months for sources required to have a schedule of compliance to remedy a violation, unless more frequent submittals are required in the applicable requirement or by the permitting authority.

(v) For affected sources applying for part 71 permits, the compliance plan content requirements specified in this paragraph (f)(9) must be met for all applicable requirements, including the applicable requirements of title IV of the Act. For permit applications required under the acid rain program, the compliance plan content requirements of 40 CFR part 72, subpart D must be met.

(10) Requirements for compliance certification, including the following:

(i) A certification of compliance with all applicable requirements by a responsible official consistent with paragraph (i) of this section and section 114(a)(3) of the Act;

(ii) A statement of methods used for determining compliance, including a description of monitoring, recordkeeping, and reporting requirements and test methods;

(iii) A schedule for annual submissions of compliance certifications during the permit term, or for more frequent submissions if specified by the underlying applicable requirement or by the permitting authority; and

(iv) A statement indicating the source's compliance status with any applicable enhanced monitoring and compliance certification requirements of the Act.

(11) The use of nationally-standardized forms for acid rain portions of permit applications and compliance plans, as required by 40 CFR part 72.

(12) Temporary sources requesting a single permit for multiple sites must also provide in the permit application ambient air quality standard and increment and visibility analyses as required under part C of title I of the Act.

(g) *Insignificant activities and emissions levels.* The following types of insignificant activities and emissions levels are exempt from the requirements of paragraph (f) of this section. Notwithstanding the preceding sentence, no activity or emission levels shall be exempt from the requirements of paragraph (f) of this section if the information omitted from the application is needed to determine the applicability of or to impose any

applicable requirement, to determine whether a source is major, to determine whether a source is subject to the requirement to obtain a part 71 permit, or to calculate the fee amount required under the schedule established pursuant to § 71.9.

(1) *Insignificant activities.* Information concerning the following activities need not be provided in the application:

(i) Mobile sources;

(ii) Air-conditioning units used for human comfort that do not use a class I or class II ozone depleting substance and do not exhaust air pollutants into the ambient air from any manufacturing or other industrial process;

(iii) Ventilating units used for human comfort that do not exhaust air pollutants into the ambient air from any manufacturing or other industrial process;

(iv) Heating units used for human comfort that do not provide heat for any manufacturing or other industrial process;

(v) Noncommercial food preparation;

(vi) Consumer use of office equipment and products;

(vii) Janitorial services and consumer use of janitorial products; and

(viii) Internal combustion engines used for landscaping purposes.

(2) *Insignificant emissions levels.*

Emissions meeting the criteria in paragraph (g)(2)(i) or (g)(2)(ii) of this section need not be included in the application consistent with paragraph (f) of this section, but must be listed with sufficient detail to identify the emission unit and indicate that the exemption applies. Similar emission units, including similar capacities or sizes, may be listed under a single description, provided the number of emission units is included in the description. No additional information is required at time of application, but the permitting authority may request additional information during application processing.

(i) *Emission criteria for regulated air pollutants, excluding hazardous air pollutants (HAP).* Potential to emit of regulated air pollutants, excluding HAP, for any single emissions unit shall not exceed 1 tpy, except in extreme ozone nonattainment areas, where potential to emit may not exceed 1,000 pounds (lb) per year. Aggregate emissions of any regulated air pollutant, excluding HAP, from all emission units shall not exceed potential to emit of 10 tpy, except in extreme ozone nonattainment areas, where potential to emit may not exceed 5 tpy.

(ii) *Emission criteria for HAP.* Potential to emit of any HAP from any single emissions unit shall not exceed

1,000 lb per year or the de minimis level established under section 112(g) of the Act, whichever is less. Aggregate emissions of all HAP from all emission units shall not exceed potential to emit of 5 tpy or the de minimis levels established under section 112(g) of the Act, whichever is less.

(h) *Application for coverage under a general permit.* Part 71 sources that qualify for a general permit must apply to the permitting authority for coverage under the terms of the general permit or must apply for a part 71 permit consistent with this section. The permitting authority may provide for applications for general permits which deviate from the requirements of this section, provided that such applications meet the requirements of Title V of the Act, and include all information necessary to determine qualification for, and assure compliance with, the general permit.

(i) *Certification by a responsible official.* Any application form, report, or compliance certification submitted pursuant to these regulations shall contain certification by a responsible official of truth, accuracy, and completeness. This certification and any other certification required under this part shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.

§ 71.6 Permit content.

(a) *Standard permit requirements.* Each permit issued under this part shall include the following elements:

(1) Emission limitations and standards, including those operational requirements and limitations that assure compliance with all applicable requirements at the time of permit issuance.

(i) The permit shall specify and reference the origin of and authority for each term or condition, and identify any difference in form as compared to the applicable requirement upon which the term or condition is based.

(ii) The permit shall state that where an applicable requirement of the Act is more stringent than an applicable requirement of 40 CFR parts 72 through 79, both provisions shall be incorporated into the permit and shall be enforceable by the Administrator.

(iii) If an applicable implementation plan allows a determination of an alternative emission limit at a part 71 source, equivalent to that contained in the plan, to be made in the permit issuance, renewal, or significant permit revision process, and the permitting authority elects to use such process, any
