**Sole Source Aquifer Designation for the Broad Brook Basin of the Barnes Aquifer**

**AGENCY:** U.S. Environmental Protection Agency.

**ACTION:** Notice.

**SUMMARY:** In response to a petition from the Barnes Aquifer Protection Advisory Committee and the Town of Easthampton, Massachusetts, notice is hereby given that the Regional Administrator of the U.S. Environmental Protection Agency—New England (EPA) has determined that the Broad Brook Basin of the Barnes Aquifer satisfies all determination criteria for designation as a sole source aquifer, pursuant to Section 1424(e) of the Safe Drinking Water Act, 42 U.S.C., section 300h-3(e). The following findings were made in accordance with the designation criteria: the Broad Brook Basin of the Barnes Aquifer supplies more than 50% of the water needs for the communities within the service area boundaries; there are no viable alternative sources of sufficient supply; the boundaries of the designated area and the project review area have been reviewed and approved by the EPA; and, if contamination were to occur, it would pose a significant public hazard and a serious financial burden to the communities within the aquifer service area. As a result of this action, the EPA may review, suggest modifications to, or withhold funding for, any federally financially assisted projects proposed for construction within the Broad Brook Basin of the Barnes Aquifer that may pose an adverse risk of ground water contamination.

**DATES:** This determination shall become effective May 12, 1995.

**ADDRESSES:** The data upon which these findings are based are available to the public and may be inspected during normal business hours at the U.S. Environmental Protection Agency—New
