

meeting the ARARs. EPA has met the requirement for performing a five-year review at the Site, as specified in Section 121(c) of SARA. The next five-year review will check future problems and be performed no later than February 1999.

Confirmational monitoring of groundwater demonstrates that no

significant risk to public health or the environment is posed by the Site. The results of the monitoring confirmed that the remedy is effective and that the landfill continues to meet ARARs.

EPA, with concurrence of FDEP, has determined that all appropriate actions at the Alpha Chemical Corporation Site have been completed, and that no

further response is necessary. Therefore, EPA is proposing deletion of the Site from the NPL.

Dated: April 11, 1995.
