

charts and should not be changed. Based on this information, GIPSA has decided not to adopt the proposed format change.

Final Action

On the basis of these comments and other available information, GIPSA has decided to revise the corn standards as proposed except for revising the format of the grading chart. Pursuant to section 4(b)(1) of the United States Grain Standards Act (7 U.S.C. 76(b)(1)), no standards established or amendments or revocations of standards are to become effective less than one calendar year after promulgation, unless in the judgment of the Administrator, the public health, interest, or safety requires that they become effective sooner. Pursuant to that section of the Act, GIPSA has determined that it is in the public interest that the revisions become effective September 1, 1996. This effective date will coincide with the beginning of the 1996 crop year and facilitate domestic and export marketing of corn. Stress crack testing service is

provided as official criteria and is not included in the U.S. Standards for Corn. Consequently, this official service will be available on January 1, 1996.
