Dedication

This book is dedicated to Nsambi and to my Eggun whom have always shown me the way in both light and darkness.

NSAMBI - On this most Sacred and Holy day I kneel before the Lord most High, the Creator of the Heavens and the Earth. The Father of the mysteries and the secrets of the angelic realm.

NSAMBI - My eyes weep for the things I see. My Lord my God forgive them for they do not know what they do.

The spirits of the dead who make a pact with the living are collectively called nkisi. The spirits come from the world of the dead and manifest through the nganga. The nganga is a miniature world and a doorway to the supernatural. The nganga is the home of the nkisi (spirit) who rests inside waiting until summoned by its owner. The spirit can only manifest to its owner who has made an eternal spiritual pact that will last until the physical death of its owner. The purpose of the spirit is to serve and protect its master by any means necessary. In the world of the spirits, good and evil are looked upon equally and weighed the same. That is, there is no distinct classification between good and evil as we Western world believes. Where do these spirits come from and why are they here? There are spirits everywhere around us. Everything, location and thing found in this world contain some kind of spiritual energy and life force. There are pantheons of spiritual entities known as restless spirits for some reason have not been able to pass through light dimensions and are trapped here inside of our world until they complete their task or their destiny. There are spiritual entities which exist and can be found in the mountains, forest, trees and other locations. These spirits are earthbound but can travel through various dimensions including our own. Through the use of ancient incantations and magical formulas, an individual can be initiated into this mysterious world which will allow them to walk with authority and respect in the realm of the spirits. In the African Congo tradition, initiations and pacts with the spirits are achieved through a series of initiations. These initiations were restricted to a hierarchy of select individuals who would honor the traditions, culture and customs of a proud African people. The capture and use of spirits to do one’s bidding is commonplace in all ancient cultures but the method by which an individual accomplished this varies. In Western and European culture individuals initiated into the spiritual mysteries were many of times referred to as witches, warlocks and sometimes sorcerers. In the African tradition they are known as Mayombero. The word Mayombero refers to an individual who possesses great occult knowledge and supernatural power to talk and command the spirits of the dead for a variety of reasons such as to heal individuals from disease, sickness, power and protection against the evil eye and entities more commonly known as demons. After the African Diaspora to the New World, these initiations and ceremonies remained almost intact with a few variations and some syncretism and the incorporation of
indigenous Indian and Christian elements. The following text is a historical documentation of some magical formulas and rituals that link and connect the physical world with the sacred and the divine. It is a world which can not be explained scientifically. It can only be explained and experienced by direct initiation and participation. The following nganga formulas were used by my family of Brazil who practice a Afro Congo religious sect known as Quimbanda. Quimbanda is a mixture of Palo Mayombe, indigenous Indian spiritualism and the Kaballah angelic system. The formulas are also used in the Caribbean by practitioners from other Afro religious sects known as Palo Mayombe, Palo Monte and Kimitia. Although the nganga formulas will vary from region or country, they have all derived from the same tribes of the African Congo. The Quimbanda religion has been known and revered as being perhaps one of the most feared, complicated and powerful forms of Congo magical religion found in the New World because it has successfully incorporated and is composed of a vast pantheon of spiritual deities, angels and demons. All of the formulas presented in this book are fundamental base formulas about how to prepare a working nganga. Over a period of time of working with the spirit, they may request more items and ingredients that can be added to the nganga. An experienced Mayombera will be able to determine this at the time of preparing the nganga. Depending on which tradition or school of learning you come from, the formulas can be modified to fit your needs. All of the spirits presented in this book can be found in many ancient cultures but are known by other names and are venerated and magically manifested differently. As an experienced elder (Tata) of the Congolese religion, I believe that an individual must find a particular spiritual path and religious philosophy which is comfortable to you. There are many paths and roads to the sacred and to the divine.

In this book, I present to you the keys and knowledge about how to prepare and unlock the doors to the world of the spirits. A beautiful supernatural world that I know to well. May your journey into this dimension of light and darkness be as successful and rewarding as it has been for me.

EXU REI
Prenda Judia

The spirit Exu Rei is the King, Messenger and the Father of all of the dark spirits and fallen angels which exist in the underworld. Exu Rei is the driving force between good and evil. This spirit Exu Rei is the direct messenger of the angel Lucifer to mankind. It is believed that through this spirit any spirit can be born or manifested in spiritual as well as physical form. Exu Rei is also the King of all of the paths of Lucero. There is no specific path of Lucero that walks with this spirit because Exu Rei is who he is and does not require any announcement for his presence. This particular type of nganga is known as unbaptized or prenda Judia. It is through this nganga that an individual makes a pact with the spiritual realm of the underworld. This particular nganga takes 81 days to complete the ritual ceremony. The ritual initiation takes place and is performed at six locations, the crossroads, the church, the ocean, the cemetery, the river and the mountain. This nganga can only be prepared on Good Friday. I would like to caution the individual who is thinking about preparing this nganga because you will be making a pact with the dark side of the universe. This permanent pact can not be revoked even in death. Remember nothing in this life is free and that there are always consequences to our actions in both the physical and the spiritual world.

Nsamba Ntala

The sacred twin spirits of the Congolese religion are known as Nsamba Ntala. These spirits can be received in one nganga or in two separate ngangas. These spirits are identified with the Orixas Jimaguis and with the Roman Catholic Saints, Saint Cosmas and Saint Damien. The following is an initiation formula to prepare them in two separate ngangas. If you would like to receive these spirits in one nganga, you can place all of the items which go into this magic spirit formula into one Nganga. These spirits are extremely powerful, unpredictable and dangerous. I would like to caution the individual priest who will attempt to bring these spirits to life. You should first consult with an experienced Palenque Priest.

It is believed that a Mayombero who performs any type of black magic on this day can not be held karmically responsible and will not receive any type of retribution for his deeds. On this day, an Ozainista will perform a series of rituals to Ozain to harness and secure his power in the supernatural world. It is also the day where he can also cleanse himself of any type of spiritual attacks or negative vibrations. The ceremony begins at 12 midnight and takes place at two locations. The ritual begins at the mountain and concludes at the river with a ritual bath. The only individuals who may participate at this secret ritual are men. Women are prohibited from all major Quimbanda ceremonies and rituals.

The following Fundamental Spirit Signatures (Firmas) are used when preparing the ngangas and the spirit Lucero in this book. The spirit signatures should be used exactly as they are presented here in this book. There are thousands of spirit signatures which can be used in the preparation of these traditional nganga formulas. The spirit signatures used will depend upon the particular Congo religious tradition which you have been initiated into. All of the following fundamental magic spirit signatures are authentic. I have used all of them with great success. It has been my experience that if these fundamental spirit signatures are not used when preparing the ngangas, the particular spirit which you are preparing will not work accurately for you. The spirit signatures are a celestial map and guide for the spirits to manifest and take on a physical form. These ancient spirit signatures are the keys to communicating and opening up the gates to the dimensions of the spirit world.
