

An American serviceman's mutilated body is dragged through the streets of Mogadishu.

housands of Somali invaders and their "instant citizen" offspring have been given "birth-to-death immigrant squatter rights" in Maine. While they transform Lewiston into a filth-strewn war zone, they arrogantly inform us, as they did in their recent walk, that "We're here to stay!" Free food, free housing, free medical care, free clothing, free everything; while White Americans slave away to pay for it.

Certainly this infuriating arrogance is not hard to understand by those of us who have watched the ethnic architects of America's destruction in action for the past 20 years: years when fiendishly clever Jewish "political piranhas" and their allies in the media were able to use words like "bigot," "racist," and "xenophobe" as effectively as the hydrogen bomb to gag the protests of White American citizens against out-ofcontrol immigration and thus "brainwash" them into silent acceptance of their own dispossession.

 \mathbf{N} ow is the time to start planning for a day when a nationally cohesive effort is initiated to force spineless congressional representatives to deport all illegal aliens and enact a moratorium on all immigration, electrify our border fences, and militarily patrol all ports of entry. Let's begin today.
