

Don't Have Sex With Blacks

Avoid AIDS!

Nushawn Williams

Warning!

According to the U.S. Centers for Disease Control and Prevention, Blacks age 13 to 24 account for 63 percent of all new AIDS cases.

Nushawn Williams, Chautauqua County NY

James Wallace Jones, Traverse City, MI

Steven (Doggy Steve) Thomas, Finland

These Black sexual predators lied about being HIV positive and had sex with *dozens* of White Women

Heterosexual Black males are *14 times* as likely as Whites to be HIV carriers. In addition, a recent survey has shown that HIV-positive Blacks are *less likely to tell* sexual partners of their infection than any other racial group. The survey showed that this is true regardless of their level of education, their number of partners, or whether or not they were drug abusers!

Don't Be the Next Victim!
