

GUILTY OF BEING WHITE

This child and millions of White children have been vilified and degraded by the combined powers of media, government, the education system, and social “thought police”. The future of this child, and many White children, remains uncertain in our nation where all things of White and European origin have been degraded. Will she be a minority in her own land? Will she be taught the proud history of her people? Is this the last generation to speak the language of our ancestors and our Founding Fathers? If something is not done these things and worse will come to pass as the nation founded by our ancestors is conquered from within. Don’t betray our children for the sake of “political correctness” and personal comfort. It is the duty of all White Americans to secure a free and promising tomorrow for future generations of our Folk.
